

Mosque to Open Overlooking the WTC 911 Scene of Islamist Murder in America

<http://MichaelBloombergHomePage.com>

It has been said that the collective memory of Americans is about 2 years. Some would say this is never more apparent than in liberal New York City, where left wing politics, Political Correctness and commerce seem to have buried the memory of the 911 crematorium for 3,000 innocent civilian Americans.

Almost ten years later, the multi acre site of the World Trade Center remains a bleak tomb for the dust of thousands. There is no plaque with the names of the dead. There is no memorial at all. And years of bickering over financial development, plans have been enmeshed with liberal influences calling for a left wing monument morphing events into an edifice commemorating Western oppression.

But all seems not to be lost as plans have been approved for an edifice overlooking the flat and pitted WTC Moonscape. It is a Mosque that has an eerie architectural similarity to what was formerly called The World Trade Center.

The new Cordoba Mosque is a product of The American Society for the Advancement of Muslims and a hard left, Politically Correct elite consumed with Moral Relativism.

The American Society for the Advancement of Muslims is a very slick organization. It proclaims their goal of Islamisation of the West not through violent jihad, but by increasing Muslim Political and social influence through "bridge building."

The Cordoba Initiative /Islamic Dialogue is lead by ASMA and is also headed by Imam Feisal Abdul Rauf. Imam Rauf is a "moderate" in a world of western hating Islamists. He is the darling of the liberal left. On the other hand, at a Friday sermon, Rauf was heard to deny that Muslims perpetrated 9/11.

In an interview with CNN shortly after 9/11, Rauf said, "U.S. policies were an accessory to the crime that happened. We [the U.S.] have been an accessory to a lot of innocent lives dying in the world. Osama bin Laden was made in the USA." Elsewhere, Rauf has stated that terrorism will end only when the West acknowledges the harm it has done to Muslims. And that it was Christians who started mass attacks on civilians.

According to ASMA, Abraham established Mecca and even built the Ka'ba that is the most holy shrine in Islam. Historically accurate? Does accuracy matter? Many Muslims now believe that Abraham was the first Muslim although Islam began some 2,000 years after Abraham's death.

In effort to tackle alleged misunderstanding about Islam amongst the American society, Cordoba House – a Masjid and Islamic cultural center as well as community center – will be built at 45 Park Place, New York. From there, you can walk to the plateau that was once the World Trade Center, quicker than eating a frank on a bun.

"The Muslim community must provide an opportunity to educate individuals about Islam through education" as quoted from a release.

Daisy Khan, the executive director of the American Society for Muslim Advancement is busy raising the estimated \$100 million for the project and is expected not to be a problem. As a further slap in the faces of the 3,000 who died and their families, Khan stated "For us, it's a symbol, a platform that will give voice to the silent majority of Muslims who SUFFER at the hands of extremists," presumably referring to Infidel Americans. Of all dates to pick, the Mosque is

scheduled to open on September 11th the exact month and day of the murderous attack on America.

Possibly it will have a roof top observation deck for visiting Muslims all over the world and America hating liberals. They can gaze at the concrete coffin that was once called "The World Trade Center." Was the World Trade Center destroyed in the name of Islam? You must be mistaken. It was done by Tea Party bigots, Christian fanatics, Zionist Jews and of course, George Bush.
